BIG ON SAFETY

Wet weather and winter gear for **BIG** storms and **BIG** rain.

FOR THE BIG JOBS.

Bisley

WORKWEAR

FOR **BIG** STORMS

AND **BIG** RAIN

Bisley Workwear offers the highest level of protection to deliver a strong health and safety solution.

In recognition of global safety standards and requirements, Bisley has developed and sourced a range of protective fabrics and treatments that protect workers across a broad range of hazardous environments. From a single line of defense, to multiple treatments on one garment, worker health and safety is our paramount concern.

Bisley Workwear's wet weather and winter gear will help you stay dry, keep warm and provide protection from the elements, all the while offering the functional features you've come to rely on.

AS/NZS 4602.1:2011
This standard covers the needs of workers in situations where vehicles may be approaching them at speed, in time for any necessary safety action to be taken, or any other industrial situation of similar risk levels where workers need to be seen at distance, against a complex visual background.

AS/NZS 1906.4:2010
Bisley Safetywear garments use high visibility materials made from durable woven or knitted fabrics and are tested for high daytime visibility. Our high quality fabrics and tapes are tried and tested to ensure you're protected in high risk situations.

AS/NZS 4399:1996
All garments that comply with this standard deliver ultraviolet protection, commonly known as UPF. Where the most effective sun protection is required, we recommend a garment that covers the full arm and leg area and has a sun protection rating of UPF 50+.

AS/NZS 1020:1995
Bisley Workwear offers a large range of natural cotton fibre products, which naturally avoid the generation of static electricity by remaining neutral, therefore increasing the wearer's comfort.

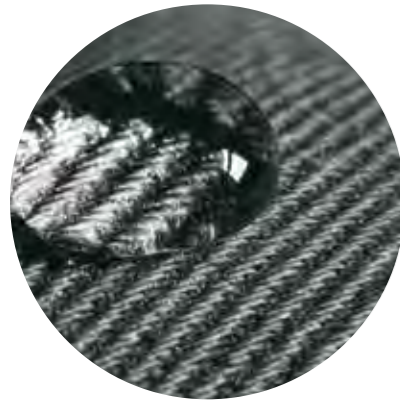

AS/NZS 2392:1999
Bisley Workwear garments meet the requirements of AS/NZS 2392:1999 which outlines the method for permanent labelling with the brand name, size, care instructions, fibre content and country of origin.

AS/NZS 2622:1996
Bisley Workwear garments meet the requirements of AS/NZS 2622:1996 which outlines the method for labelling of fibre content in textile products.

AUSTRALIAN AND INTERNATIONAL STANDARDS

AS 2001.2.17-1987
Bisley Workwear 'water proof' garments are deemed compliant when no water has passed through it over an 18 hour period. These garments have a water-repellent or water-resistant coating that stops moisture from reaching the wearer in wet weather conditions.

ISO 14184-1.1998
Fabrics used in Bisley Workwear garments are tested regularly to ensure that naturally created formaldehyde levels are kept to the safe minimum standard set out by the ACCC (Australian Competition & Consumer Commission). Bisley Workwear garments are free from formaldehyde.

AS/NZS 1957:1998
Bisley Workwear garments meet the requirements of AS/NZS 1957:1998 that outlines the care instructions needed to ensure proper care of the garment.

SOFT SHELL

FABRIC

- 94% Polyester/ 6% Spandex 310gsm Soft Shell with Brushed Fleece Bonded Lining
- 100% Polyester Open Mesh Lining

WET WEATHER

Making a product waterproof isn't difficult, but making a product waterproof, breathable and durable enough to retain these properties over time is difficult, and at Bisley Workwear we have achieved just that.

Bisley Workwear wet weather garments have been designed to keep you dry and comfortable and protect you from the elements at work. Our garments offer water and wind resistance in lightweight fabrics that repel rain and water, keeping you dry whilst remaining breathable so you are comfortable at all times.

In the Research & Development process Bisley Workwear's waterproof 300 Denier polyester oxford has been extensively tested against Australian and International wet weather methods to ensure we are providing the best protection available. Our Oxford fabric with PU coating has performed extremely well under Australian wet weather fabric tests such as water repellency – spray rating (AS 2001.1.16) and water resistance – hydrostatic method (AS 2001.2.17). Our fabrics achieved great results. A spray test rating result above 80 (highest level is 100) and a high waterproof penetration resistance of up to 20,000mm (200Kpa/H₂O).

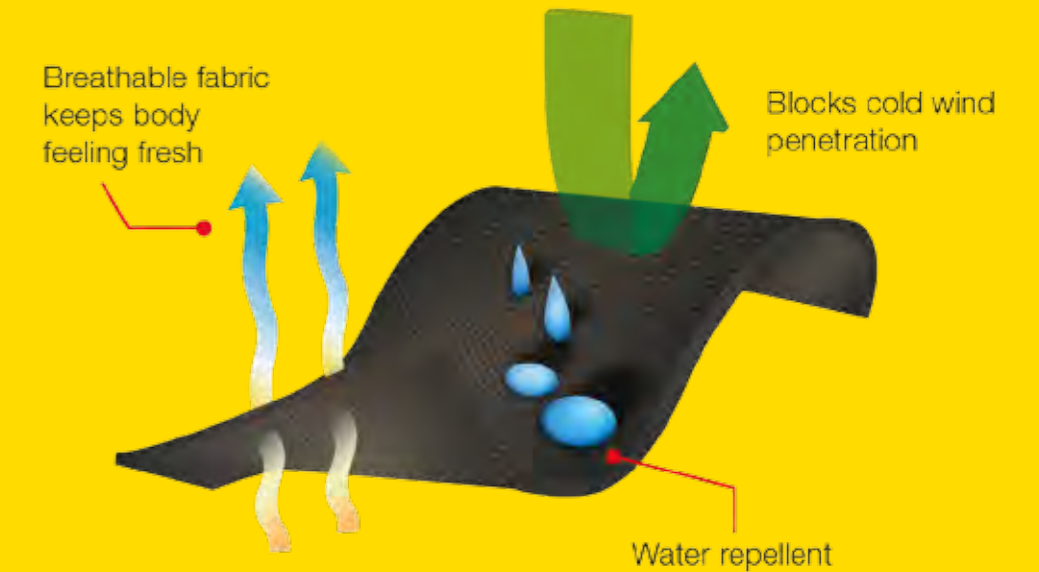

Our wet weather fabrics have also been tested under the International standard - EN 343:2003 - Protection against Rain. This standard tests two properties, 1) water resistance and 2) water

vapour penetration (also known as permeability or breathability) of the fabric. Under these 2 testing methods our fabric results have reached or exceeded Class 3 which is the highest standard available.

For reassurance we also tested our wet weather fabrics against the American standard for Water Vapour Penetration (ASTM E96/E96M:2010) achieving a result of over 3,750grams/m²/24hrs.

All Bisley Workwear wet weather garments are 100% seam sealed – to ensure your continued protection from water penetration whilst at work.

All our Bisley winter garments, have been designed to meet Australian and New Zealand Safetywear standard: AS/NZS 4602.1:2011 and all of our fabrics and materials meet the AS/NZS 1906.4:2010 standard.

WET WEATHER

FABRIC

- 300D Oxford Polyester, PU Coated (Breathable)
- 100% Polyester Mesh Lining

PRODUCT FEATURES

- Waterproof fabric with breathability
- All seams are seam sealed
- All high visibility materials comply according to AS/NZS 1906.4.2010 standards
- Garments comply in accordance to AS/NZS 4602.1:2011 - suitable for Day/Night use
- Fabric CLASS 3 for Water Resistance and Water Vapour Permeability under EN 343:2003 - Protection against rain.
- Independent Test results :
WP - 200Kpa/per minute
VP - > 3750g/m²/24hrs

JACKETS

- Storm flap with touch tape and zip closure
- Adjustable 1/2 elasticated cuff with touch tape tab closure
- Lower sleeve in contrast colour for dirt protection
- Secured and hideaway hood with high collar stand

ADDITIONAL FEATURES
